

## NEW! GPS Speedometer LC-8300A

The lineup of GPS speedometers has been **renewed**. The LC-8300A is the flagship model developed by our company, a pioneer of speedometers.

[LC-8300A Product Page](#)

### Features

#### ◆Achieve outstanding stability

- Improved satellite acquisition performance
- GPS supported by IMU correction

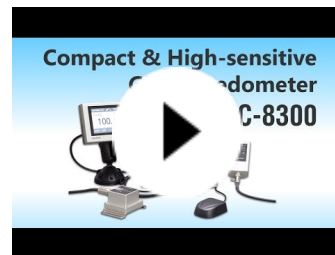

#### ◆Expanding application scenes

- Noise test
- Actual driving test
- Coasting test
- Test under bad weather\*

#### ◆High response

- Is achieved by the correction function using IMU even in sudden acceleration, sudden braking

\* The antenna has a protection class of IP67, thus it can be installed on the vehicle even in bad weather.

## EVENT —Inter-Noise 2023—

Date: August 20 to 23, 2023

Venue: Makuhari Messe  
2-1, Nakase, Mihama-ku, Chiba-city

The 52nd Inter-Noise, the world's largest international conference on sound and vibration control, will be held in Japan.

About 1,000 people from over 40 countries around the world are expected to participate.

In Japan, this will be the 4th exhibition over 12 years.

### Background of the exhibition of Ono Sokki

Ono Sokki also participates in the organizing committee as a member, planning and preparing for Inter-Noise 2023, as theme setting and logo design.

As involved in a platinum level sponsorship company we are contributing to this international conference.

**[Exhibition from Ono Sokki]**

- [DS-5000/O-Solution](#)  
Sound and vibration analysis system
- [LA-7000series](#)  
Sound Level Meter
- [Sound Power Level Measurement system](#)
- [Sound One](#)  
Web application for sound evaluation

**[Paper Presentation]**

- ◆ Anomaly detection and visualization for sound data with pretrained deep neural networks. -Keisuke Kimura (Ono Sokki)
- ◆ Combining online aural experimentation and physical analysis. -Koji Ishida (Sound One)
