

Signal cable for high temperature NP-0180 series

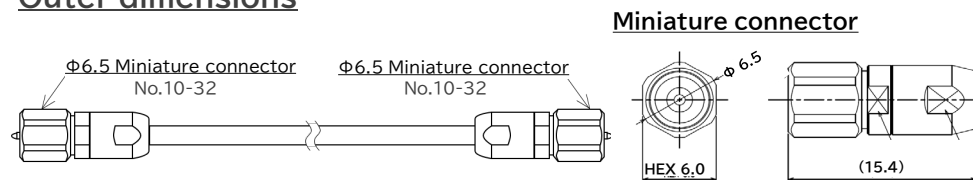

■Overview

The NP-0180 series can be used for measuring sound and vibration in high temperature environments.

Appearance image

Outer dimensions

Model name	Length	Specifications	Compatible sensors
NP-0181	1.5 m	Operating temperature: -40 to +200°C (*1) Cable diameter: ϕ 2.4 mm Cable material: Silicon Cable type: Low noise	·NP-2120/2810 ·NP-3120/3121/3130/3131 ·MI-3140
NP-0182	3 m		
NP-0183	5 m		
NP-0184*2	10 m		

*1 The temperature range of +180°C to +200°C can be used for up to 250 hours.

*2 To be sold shortly.

■Features

1 Usable in high temperature environments up to 200°C. (*1)

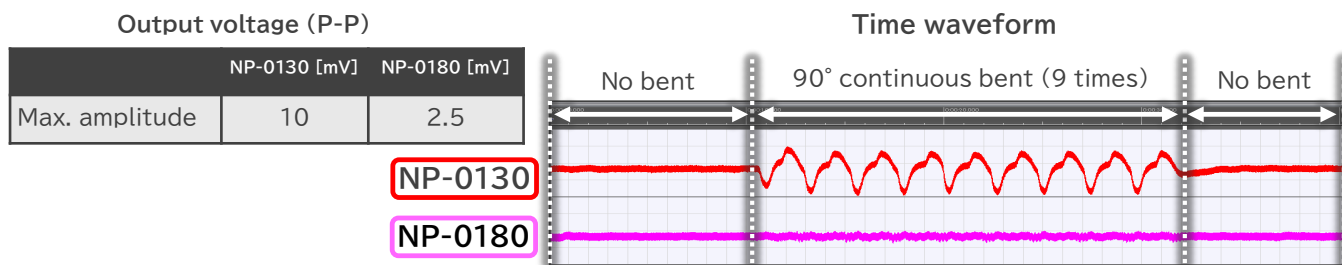

2 Good flexibility for easy wiring. (*3) (*4)

3 Improved low-noise performance to reduce noise caused by friction when the cable is bent. (*3)

*3 Compared to the existing model NP-0130 series.

*4 By changing the wire material to a twisted wire, flexibility and bending durability have been improved.

Comparison of noise waveforms and peak values in continuous bending tests
